

Mauna Loa Solar Observatory Observer's Log

---

Sat May 21 17:09:32 GMT 1994

Year: 94 Doy: 141

Observer: koon

COMMENT: Sat May 21 17:09:39 GMT 1994

Thick cirrostratus overcast, wind ~5 mph from the southeast, temp ~45 F.

No observing today.

DPMON COMMENT: Sat May 21 18:54:23 GMT 1994

Installed new Lyot stop with IR filter that came in the mail yesterday.

Will have to wait for a good observing day to see how it works.

LOW-L COMMENT: Sat May 21 18:56:24 GMT 1994

Low-l crashed yesterday, will send out crash parameter list and then try the software changes suggested by David.

LOW-L COMMENT: Sat May 21 23:07:27 GMT 1994

Setup Low-l software to run without the graphics screen, enabling the viewing of the error message the next time the Low-l crashes.

The Low-l is running now.

COMMENT: Sat May 21 23:09:47 GMT 1994

Worked on GONG test instrument, will try to make one good one from the two marginal instruments that we have.

COMMENT: Sat May 21 23:11:13 GMT 1994

TAPES:

LOW-L: L00047 in drive #0, crashed with L00045 in drive #1, removed L00045 and L00046 (from drive #0), installed L00047 in drive #0 and L00048 in drive #1.
