Cold, clear, east wind 20-30 mph, temp = 39F.

COMMENT: Wed Jul 13 17:19:19 GMT 1994  
Originally started up with Duc logging in, but started DPMON without  
first pointing spar, then found that we were not able to use  
the log aliases--hadn't been copied to his .login file yet.  
We powered back down, pointed the spar, and restarted with  
Yasukawa logging in. Will copy files over later.

MKIII COMMENT: Wed Jul 13 20:59:32 GMT 1994

There may be some subtle coronal changes in the northwest quadrant, but it is difficult to determine due to the wind buffeting.
