

Mauna Loa Solar Observatory Observer's Log

---

Thu Jul 14 21:40:34 GMT 1994  
Year: 94 Doy: 195  
Observer: koon

I accidentally deleted the log for today, sorry.  
It was a clear day with light wind, orographic clouds came over in the afternoon. Not many log entries were made except for when I changed to optimum disk and limb setups for the DPMon and when I extended the dome. Nothing unusual was reported.

Activity report:  
QP: 47; 103; 283; 303.  
No coronal activity.

TAPES:  
MKIII: H00799  
DPMON: P00107  
LOW-L: L00077
