DPMON COMMENT: Tue Aug 9 01:07:04 GMT 1994
Paused to change the occulting disk and manually test. New occulting disk
size is 1931" (was 1921").

DPMON COMMENT: Tue Aug 9 01:41:40 GMT 1994
The Patrol program crashed and the Display and Focus windows disappeared.
Didn't find the core dumped like usual with this type of crash. Rebooted
and restarted.

DPMON COMMENT: Tue Aug 9 01:43:25 GMT 1994
NOTE: The above mentioned crash occurred when I started Patrol after running
Manual to find the best occulting disk.

WEATHER COMMENT: Tue Aug 9 01:45:49 GMT 1994
Lots of orographic clouds coming in and some cirrus starting to come in from
the west.

Tue Aug 9 02:02:17 GMT 1994: Calibration

COMMENT: Tue Aug 9 02:37:54 GMT 1994
Extended low end of dome slot.

Tue Aug 9 03:02:14 GMT 1994: Calibration

COMMENT: Tue Aug 9 03:47:19 GMT 1994
Spar lost tracking due to increasing cable drag. I was watching cables to
be sure nothing was in danger of damage. I reorganized the cables so that

they all follow the same main route and added enough slack to accomodate tracking until sunset.

DPMON COMMENT: Tue Aug 9 04:08:25 GMT 1994

Telescope mostly blocked by bottom edge of dome slot so I'm stopping Patrol.
