Year: 94 Doy: 308

Observer: koon

WEATHER COMMENT: Fri Nov 4 16:57:18 GMT 1994

Very thick low level clouds, they are dark and it will surely rain with a possibility of thunderstorms. Wind is ~25 mph. I will check that everything is secure and turn off some of the breaker switches in preparation for possible thunderstorms. No observations today.

LOW-L COMMENT: Fri Nov 4 17:04:57 GMT 1994

L00127 removed and L00129 installed in drive #0.
