LOW-L COMMENT: Sat Jan 14 22:26:37 GMT 1995

Just noticed that the program crashed at 2143, same type of crash as the
original type, frozen screen with the row of strange rectangles, head
pointed straight up.

Had clouds move in before the crash, I've noticed that other crashes
happened after clouds moved in.

Will remove L00164 from drive #0 and replace it with L00165 from drive #1
and install L00166 in drive #1. Will notify David and Steve.
