

Mauna Loa Solar Observatory Observer's Log

---

Sun May 14 16:33:08 GMT 1995

Year: 95 Doy: 134

Observer: yasukawa console May 14 16:29

WEATHER COMMENT: Sun May 14 16:33:50 GMT 1995

Cold, clear, strong southeast wind 20-30 mph.

LOW-L COMMENT: Sun May 14 16:34:25 GMT 1995

Lowl crashed yesterday at 21:29:56, tape unit 1. Removed

Loo235 from unit 0 and L00236 from unit 1. Loaded L00237 and L00238.

Rebooted.

COMMENT: Sun May 14 16:54:32 GMT 1995

No observations today. Guider still down. Howard could not find a suitable spare in HAO supply cabinets. He will order a new one ASAP Monday morning from Vernitron, presumeably. We will await receipt of the replacement motor before repair is complete and observations can resume.
