Thick cirrus and medium cirrostratus, wind=5 mph from the SW, temp=33 F.

LOW-L COMMENT: Mon May 29 16:50:10 GMT 1995

Program crashed at 1547, probably while trying to start up for the day.

Removed L00247 from drive #0, moved L00248 from drive #1 to drive #0,  
installed L00249 in drive #1. Since the tape in drive #0 was popped out,  
the program may have been trying to write to drive #1 when it crashed.

WEATHER COMMENT: Mon May 29 20:56:18 GMT 1995

Sky never cleared up, no observations.
