

Mauna Loa Solar Observatory Observer's Log

---

Thu Jun 1 16:38:34 GMT 1995

Year: 95 Doy: 152

Observer: yasukawa console Jun 1 16:22

WEATHER COMMENT: Thu Jun 1 16:38:58 GMT 1995

Cool, in heavy cirrus overcast, light southeast wind.

COMMENT: Thu Jun 1 16:40:15 GMT 1995

Slow startup, net down beyond mloha (NOAA-FB). Post-reboot screen on terminal this morning. I left it in post-exit screen yesterday. H01033 was not popped out as it normally is upon arrival.

MKIII COMMENT: Thu Jun 1 16:42:56 GMT 1995

Cleaned MKIII Exabyte head this morning.

LOW-L COMMENT: Thu Jun 1 17:37:21 GMT 1995

Lowl halted by parity error caused by bumping into keyboard while vacuuming control room. Removed L00240 from unit 1. Loaded L00251 into unit 1, restarted Lowl on L00250 in unit 0 after cleaning heads on both Exabyte units for the month.

COMMENT: Thu Jun 1 17:59:15 GMT 1995

Network back up.

COMMENT: Thu Jun 1 18:10:55 GMT 1995

Logging out for now. Looks like observations unlikely. Going down to GONG shelter to interface with installation crew.

COMMENT: Thu Jun 1 18:11:45 GMT 1995

TAPES: LOWL: L00249 and L00250

Thu Jun 1 18:12:38 GMT 1995: Filemark
