COMMENT: Thu Oct 12 17:31:02 GMT 1995

Hardy Tsutsumi of DEC just called and we agreed to have a preventive maintenance done on the 11/44 system today. He plans to run diagnostics on the RL02s and verify the data disc packs in addition to his regular maintenance. The plan is for him to arrive at around 2030 UT and take down the MKIII system. I will transfer the SCAN-LOG before shutdown, and continue DPMON observations.
