

Mauna Loa Solar Observatory Observer's Log

Wed Oct 18 16:44:05 GMT 1995

Year: 95 Doy: 291

Observer: yasukawa console Oct 18 16:42

WEATHER COMMENT: Wed Oct 18 16:44:10 GMT 1995

In medium to heavy cirrus overcast, cool, moderate south wind.

COMMENT: Wed Oct 18 16:51:54 GMT 1995

Cirrus quite thick at this time, guiding very marginal.

COMMENT: Wed Oct 18 19:58:19 GMT 1995

Still in thick cirrus overcast. Decommissioned GONG site survey instrument per Frank Hill's directive that site survey be terminated now that the network is up and operational.

Mailing last tape to Frank. Packed up instrument after removing battery. DVM battery was left installed. Stored instrument per Frank's instructions that we may keep instrument and Don Hassler's acceptance of the offer.

So.... as we say over here.... PAU!

COMMENT: Wed Oct 18 21:01:37 GMT 1995

Cirrus overcast still heavy and quite extensive. No observations today.

Tapes: LOWL: L00330 un unit 0.

Just noticed that data was going onto unit 0. L00329 was still in unit 1. It did not autoeject. Ejected manually and loaded L00331 into unit 1.
