

Mauna Loa Solar Observatory Observer's Log

---

Thu Nov 2 16:52:07 GMT 1995

Year: 95 Doy: 306

Observer: yasukawa console Nov 2 16:48

WEATHER COMMENT: Thu Nov 2 16:52:21 GMT 1995

Cold, sun behind high cumulonimbus clouds on east slope, locally generated altostratus clouds all around, southwest wind.

Lightning and thunder earlier this morning over east coast.

LOW-L COMMENT: Thu Nov 2 16:54:14 GMT 1995

L00338 popped, loaded L00340 into unit 0.

DPMON COMMENT: Thu Nov 2 16:54:39 GMT 1995

MKIII tape was not popped out of DPMON exabyte drive this morning. manually ejected it and loaded DPMON tape for the day.

COMMENT: Thu Nov 2 16:58:34 GMT 1995

Keeping dome closed for now.

COMMENT: Thu Nov 2 18:03:03 GMT 1995

Experienced brief power outage between 1753-1755.

LOW-L COMMENT: Thu Nov 2 18:03:43 GMT 1995

Since there was no data on L00339 due to heavy overcast, I ejected both tapes, did monthly cleaning of drive 1, and swapped tapes.

Started up after power outage with L00339 in drive 0 and L00340 in drive 1.

WEATHER COMMENT: Thu Nov 2 18:38:22 GMT 1995

It is now raining and some distant thunder can be heard.

COMMENT: Thu Nov 2 18:45:27 GMT 1995

No data today at this time.

I am shutting down and sending logs in case the power should go down again. If weather should change, there will be an addendum to today's log.
