

Mauna Loa Solar Observatory Observer's Log

Fri Nov 24 17:22:13 GMT 1995

Year: 95 Doy: 328

Observer: koon console Nov 24 17:20

WEATHER COMMENT: Fri Nov 24 17:22:19 GMT 1995

Thick cirrocumulus overcast, wind=10 mph from the SSW, temp=38 F.

LOW-L COMMENT: Fri Nov 24 17:59:24 GMT 1995

Removed L00350 from drive #0, in the mean time the tape in drive #1 popped out (L00351), so I installed L00352 in drive #1 and moved L00351 to drive #0. I had to cycle the power to drive #1 before it would take L00352 without popping it out.

WEATHER COMMENT: Fri Nov 24 18:12:06 GMT 1995

Cloud cover isn't clearing, no observations.

COMMENT: Fri Nov 24 18:12:31 GMT 1995

TAPES:

LOW-L: L00351 in drive #0

Fri Nov 24 18:13:06 GMT 1995: Filemark
