Content-Length: 708

X-Lines: 23

Status: RO

WEATHER COMMENT: Sat Dec 16 17:39:04 GMT 1995

Foggy, frosty, wind=15 mph from the SE, temp=38 F.

LOW-L COMMENT: Sat Dec 16 21:30:35 GMT 1995

Changed the Lowldefs.h program MAX\_FILES value to 86 as suggested by David Elmore, to take advantage of our new high density tape drives. Removed L00362 from drive #0 (it was popped out), moved L00363 from drive #1 to drive #0 and restarted observations (nothing on it due to clouds and fog), also installed L00364 in drive #1.

WEATHER COMMENT: Sat Dec 16 21:59:23 GMT 1995

Still getting passing fog and clouds, closing down, no observations.

COMMENT: Sat Dec 16 21:59:57 GMT 1995

TAPE:

\*\*\*\*\*

LOW-L: L00363 in drive #0
