

Mauna Loa Solar Observatory Observer's Log

---

Sat Feb 17 17:35:12 GMT 1996

Year: 96 Doy: 048

Observer: koon console Feb 17 17:33

WEATHER COMMENT: Sat Feb 17 17:35:18 GMT 1996

Thick cirrostratus and cirrocumulus overcast, wind=30 mph from the WSW,  
temp=33 F. Observing is unlikely for today.

LOW-L COMMENT: Sat Feb 17 18:27:40 GMT 1996

Found both tapes popped out of drives, program was still running and  
instrument head was pointing at the sun. Pushed L00374 back into drive #0  
and removed L00373, cleaned tape drive #1 (lights were blinking), then  
installed L00375 in drive #1. Cycled power to the computer and to each  
drive then restarted program.

WEATHER COMMENT: Sat Feb 17 19:35:00 GMT 1996

Clouds are getting thicker, no observing today.

TAPE:

\*\*\*\*\*

LOW-L: L00374 in drive #0
