WEATHER COMMENT: Sun Mar 3 17:08:04 GMT 1996
It is raining VERY hard. Wind out of south 40mph, gusting to 60mph.
Minor flooding inside control room around south door, swabbed what
I could out (for now). No standing water inside dome, only spatters
on floor around dome shutter. I don't think there will be any obs
today. Solid clouds. Satellite imagery showing broad band of high
clouds over island above this heavy thunderclouds.

Sun Mar 3 17:12:28 GMT 1996: Filemark

Note from Darryl about doy 63:

LOW-L COMMENT: Mon Mar 4 17:37:23 GMT 1996
This note is from yesterday: L00374 removed from and L00376 installed in
drive #0 after cleaning that drive.
