WEATHER COMMENT: Mon Mar 4 17:34:04 GMT 1996

Raining, wind=30+ mph from the SW, temp=32 F, icy road and boardwalk, barely made it up here, door was frozen closed but I was able eventually pull it open (maybe the vibration caused by my shivering helped). I will mop up the water on the floor near the refrigerator then head back down while I still can.

This note is from yesterday: L00374 removed from and L00376 installed in drive #0 after cleaning that drive.
