DPMON COMMENT: Fri Apr 5 17:30:26 GMT 1996 Not sure why, but the scanning stopped with a prompt on the screen to insert the opal, then asked me what channel, I did a CTRL-C to get out of whatever that routine was then started scanning again.

WEATHER COMMENT: Fri Apr 5 17:33:02 GMT 1996 The sky is quite bright today, the "loaf of bread" is relatively tall.

WEATHER COMMENT: Fri Apr 5 20:40:59 GMT 1996 Orographic clouds are starting to build up in the East.

LOW-L COMMENT: Fri Apr 5 20:59:07 GMT 1996 Since the West 2 controller temperature was over 40 C I lowered the heater setpoint from 26 to 25 C on Tuesday, that helped but was not enough so I lowered it to 24 C today. Also taped the broken cable hose near the head.
