DPMON COMMENT: Wed May 29 16:56:20 GMT 1996

May have seen first sign of "post-occulting change bounce."

DPMON COMMENT: Wed May 29 17:37:06 GMT 1996

Reduced rear weight in attempt to damp bounce. Weight is not secured. Initial indication is bounce was reduced.

DPMON COMMENT: Wed May 29 17:41:01 GMT 1996

Nope, bounce still occurring at same intensity.

DPMON COMMENT: Wed May 29 17:43:05 GMT 1996

Reduced the weight a little bit more.

DPMON COMMENT: Wed May 29 17:44:30 GMT 1996

That made it worse.

DPMON COMMENT: Wed May 29 17:50:23 GMT 1996

Put original rear weight back on without the clamp('s weight) to secure it. I did not notice MKIII O1 guider trying to correct for spar guiding error when occulting was changing, indicating that the bounce may be isolated to the DPMON rather than to the spar as a whole.

DPMON COMMENT: Wed May 29 17:52:55 GMT 1996

Bounce still present. Securing the weight.

DPMON COMMENT: Wed May 29 19:14:44 GMT 1996

Occulting offset did not recover for a longer time around 1845
so I adjusted O1. Image seems to have stabilized around the
image transfer time of 1900 UT.
