Year: 96 Doy: 327

Observer: koon

WEATHER COMMENT: Fri Nov 22 17:38:46 GMT 1996

Thick altocumulus with medium to thick cirrostratus above that, wind=5 mph from the West, temp=44 F. Probably can't observe today.

COMMENT: Fri Nov 22 17:39:43 GMT 1996

Read the HELCO meters this morning.

CHIP COMMENT: Fri Nov 22 18:22:43 GMT 1996

I helped David load and test the new MCC software, it allows us to view the hourly images that are transferred to Boulder in a time-lapse animation, neat.

WEATHER COMMENT: Fri Nov 22 19:06:41 GMT 1996

Clouds are getting worse, going to do some work at the GONG shelter then head down the mountain.
