Observer: koon

WEATHER COMMENT: Fri Dec 6 17:13:35 GMT 1996

Thick cirrostratus and altocumulus overcast, wind=10 mph from the SE,  
temp=39 F.

MKIII COMMENT: Fri Dec 6 18:26:56 GMT 1996

Glad to see that the noise was indeed only caused by a loose connection and  
that Eric found the loose connection in the suspected area. Sorry to hear  
about the dented skull incident though.
