COMMENT: Thu Mar 20 17:03:05 GMT 1997

While we are in heavy cirrus and in anticipation of a possible power
shutdown sometime today, I will go down to GONG --- hold that.

Construction crew just called and said that the shutdown will be t
between 7:30-8:00 AM, depending when the electrician gets up here
today. I will prepare for the shutdown. I won't bother opening
up before the power event.

Stopping LOWL--good timing.
