COMMENT: Tue Jun 10 17:00:51 GMT 1997

Installed the new tape drive just received from Boulder. Used the terminator that was on the previous tape drive, it looks like that was probably the spare active terminator that we received last Saturday from Boulder. Will keep the Lowl tape drive #1, which was being used previously for CHIP, disconnected on the side in case we need to switch back to it again. If all goes well by the time we need to change the next Lowl tape (probably next Saturday) then I'll install that tape drive back on Lowl.

```
Spar was losing tracking in declination so I moved a weight to change the
balance. So far it is tracking better and it should be better balanced
in RA now too.
