MKIII COMMENT: Sat Sep 20 20:16:11 GMT 1997
Having mechanism control problems. You will have to use
a dark from another day. Opal measurements are OK.

Sat Sep 20 20:35:00 GMT 1997 CHIP End Patrol

COMMENT: Sat Sep 20 20:35:44 GMT 1997

Pausing observations due to clouds and to work on the MK3 Opal, it is
slipping again.

MKIII COMMENT: Sat Sep 20 22:31:48 GMT 1997

I fixed the transmission that we took out of the Opal drive a few days
ago, it had a strange clutch that was slipping, unfortunately all the
gearing has to be removed to get to the clutch. The clutch on the
newer trans was slipping today so we removed that and put in the old
fixed trans, then I fixed the other slipping trans. So now we have
two good motor/trans units in the bottom shelf of the black parts
cabinet. We adjusted the limit switches to allow the Opal to
function correctly without requiring as much torque from the motor
as before near the in and out limits. Hopefully this will do it.

COMMENT: Sat Sep 20 22:38:49 GMT 1997

Activity report:

QP: 55-70; 112; 217; 244; 294; 313.

No coronal activity.
