Mon Sep 29 16:50:38 GMT 1997

Year: 97 Doy: 272

Observer: yasukawa

WEATHER COMMENT: Mon Sep 29 16:53:45 GMT 1997

Cool, clear, light south wind.

MKIII COMMENT: Mon Sep 29 16:54:13 GMT 1997

I did not see tape load when pressing Begin Day. Button just flashed and Idle lit up. Tape window Idle is lit. Pressing Load to see if things get different.

MKIII COMMENT: Mon Sep 29 16:56:41 GMT 1997

Pressing Load does nothing. Starting Patrol.

Mon Sep 29 16:57:10 GMT 1997 MKIII Start Patrol

Mon Sep 29 17:01:00 GMT 1997 PICS Start Patrol

MKIII COMMENT: Mon Sep 29 17:20:53 GMT 1997

According to MKIII commands email of July 18 and David's email response this morning, aborting the mistaken Correct prevented the corrector table from being rewritten. The file is not written until the procedure is finished, phew! I will stand down on any plans to fix that mistake.

(yesterday afternoon's accidental Correct while attempting an End Day)

MKIII COMMENT: Mon Sep 29 17:53:55 GMT 1997

Files after 1732 are not being written to giflist, thus not appearing on the XAnim display. cmdtool is awfully busy spewing out lines stating it cannot find various \*.temp directories as well as what looks like stuff being written or attempts to write stuff.

MKIII COMMENT: Mon Sep 29 17:58:55 GMT 1997

Calibrating MKIII.

COMMENT: Mon Sep 29 20:01:14 GMT 1997

Steve Sadler and John Perreira have arrived to do some electrical safety modifications and checkout. I will need to power everything down so that they can shut off power to the building.

Shutting down now.

COMMENT: Mon Sep 29 20:09:06 GMT 1997

Activity report:

QP: 118; 134; 274; 299; These PA's are measured with the overlay's 180 degree mark centered on the stem and the P-angle of 25.89 subtracted from the reading. I assume it is the case from the scribblings on the overlay.

Tapes: MKIII: H01649

PICS: P00999
