COMMENT: Sun Oct 12 19:36:55 GMT 1997

Finished convincing the phone company that there is still a problem with both of our phone lines. They said they could tell from the central office yesterday that all was well, wrong. There was a big equipment c changeover starting Friday evening around midnight to allow them to "provide better service to there customers", wrong, anyway these problems seem to have started or been accentuated at that time. They will check with the central office again and then maybe actually come up here on Monday. I will give a more detailed message to Eric.

WEATHER COMMENT: Sun Oct 12 22:10:08 GMT 1997

Clouds are getting increasingly thick, stopping observations.

MKIII COMMENT: Sun Oct 12 22:17:15 GMT 1997

Did End Day and the Unload light eventually came on and stayed on, tape didn't eject. The last file transfer time shown on the Akamai window

was 2141 ut, but the last file shown in giflist was at 2207 ut. I'm not sure if the Write field was green or if data actually went to tape between

2141 and 2207, this may be the same type of problem I reported yesterday.
