LOW-L COMMENT: Sun Oct 26 17:54:17 GMT 1997

Data stopped going to L00479 sometime yesterday, data were going to L00480 on drive #0 instead. L00479 was in drive #1, the tape didn't pop out of the drive, the cleaning LEDs weren't lit, and data should have gone to this tape for several more days. I removed L00479, cleaned drive #1, installed L00481 in drive #1.
