Year: 97 Doy: 300

Observer: yasukawa

WEATHER COMMENT: Mon Oct 27 17:24:40 GMT 1997

Cool, in cirrostratus, brisk south wind.

MKIII COMMENT: Mon Oct 27 17:25:08 GMT 1997

Nahenahe monitor broken. No display, only grey screen with a white diagonal line crossing the screen several times. None of the buttons on front panel responded. Removed monitor and replaced it with kii monitor.

MKIII COMMENT: Mon Oct 27 17:28:25 GMT 1997

Standing by with MKIII, cirrus too thick to be taking worthwhile data at this time.

MKIII COMMENT: Mon Oct 27 19:18:27 GMT 1997

Checked out failed monitor. Tried last test in manual under NO PICTURE section. Unplugged video cable and held contrast+ button down for a few seconds. Screen did not come up with color bars as it should if it were working. Instead, same grey screen with the diagonal lines appeared. Power led blinked green and amber alternately at around 1-sec cadence.

LED diagnostic is not in manual, but test indicates potential monitor failure.

WEATHER COMMENT: Mon Oct 27 21:14:18 GMT 1997

Still in cirrus, stopping for the day.

COMMENT: Mon Oct 27 21:14:36 GMT 1997

Tapes:

MKIII: No data

PICS: P01022

LOWL: L00480

Recycled 10/25: H01673 and H01674, this was indicated in text of logs but not in "Tapes:" area for easy confirmation.
