Wouldn't get going correctly, KCC screen frozen with converging intro incomplete, akamai startup script kept restarting, I pressed reset

(for the second time, first time after the usual tape drive not detected)

to clear problem.

WEATHER COMMENT: Sun Nov 2 18:57:47 GMT 1997

The wind has picked up to about 25 mph from the East, the clouds that were

below me have reached me now. I closed down the dome and now it is

starting to get foggy. Further observing today is unlikely judging from

this weather pattern and the high wind warning from the Weather Service.

Doing a scintillometer data dump to disk.
