WEATHER COMMENT: Sun Jan 11 20:17:40 GMT 1998

Thin cirrostratus still present.

MKIII COMMENT: Sun Jan 11 20:17:56 GMT 1998

I try the dark shutter every 30 minutes at least and still haven't found it stuck yet.

MKIII COMMENT: Sun Jan 11 21:03:52 GMT 1998

I couldn't get the dark shutter to stick so I took apart the drivetrain, it looked OK so I tightened the clutch about 1/4 revolution. This may cure problem, only time will tell since the problem is infrequent. Maybe the clutch is wearing down due to the new control system which may be driving the mechanism for too long after it stops, causing the clutch to slip a lot. I think we should cut back on the drive time to what is barely needed plus maybe two seconds, to extend the life of the clutch.

PICS COMMENT: Sun Jan 11 21:27:51 GMT 1998

Stalled with Program: K-corona, not sure how long since I was up in the dome for a while working on MK3, fixed with Kill/Run.
