Extended the dome slot.

COMMENT: Wed Mar 25 20:58:01 GMT 1998

The Spar kept losing tracking in declination, I had to rebalance a little to fix the tracking problem. It was too bottom-heavy.

COMMENT: Wed Mar 25 21:11:21 GMT 1998

I had to adjust the Spar balance again, the wind is about 25 mph straight into the slot and is accentuating the imbalance. Hopefully this will do it.
