Mauna Loa Solar Observatory Observer's Log ______ Fri Oct 30 16:47:29 GMT 1998 Year: 98 Doy: 303 Observer: yasukawa Fri Oct 30 16:52:46 GMT 1998 CHIP Startup--Initializing new tape WEATHER COMMENT: Fri Oct 30 16:53:20 GMT 1998 Cool, clear but scattered cirrus around, brisk south wind. Fri Oct 30 16:54:56 GMT 1998 PTCS Start Patrol CHIP Fri Oct 30 16:55:13 GMT 1998 CHIP Start Patrol Fri Oct 30 17:00:48 GMT 1998 MKIII Start Patrol Fri Oct 30 17:01:53 GMT 1998 CHIP Bias Fri Oct 30 17:02:31 GMT 1998 PICS Flat Fri Oct 30 17:02:42 GMT 1998 CHIP End Bias Fri Oct 30 17:02:49 GMT 1998 CHIP Water Fri Oct 30 17:03:25 GMT 1998 CHIP End Water Fri Oct 30 17:03:56 GMT 1998 PICS End Flat **MKIV PROBLEM**: Fri Oct 30 17:12:51 GMT 1998 Found that nahenahe tape drive was plugged into switched outlet on power controller. This was why overnight tar did not work. Plug would not go all the way into the remaining unswitched outlet, something is blocking complete insertion. I plugged drive into another unswitched power strip temporarily until the block can be resolved. MKIII COMMENT: Fri Oct 30 17:16:44 GMT 1998 Started Patrol at 1700, but just noticed that spar power is off at power strip upstairs. Turned it on and Patrol resumed. Still looking at dome wall. **PSPT PROBLEM**: Fri Oct 30 20:29:44 GMT 1998
PSPT dome ran the wrong way. Stopped it with rotator power switch,
and it started up in the correct direction and stopped at the correct
azimuth. Relay inside controller box has been clicking off and on
for the last hour intermittently. We should get them replaced.
**PSPT PROBLEM**: Fri Oct 30 20:43:58 GMT 1998
dome is pointed short of correct azimuth, telescope looks like it is
pointing too far west. Dome kept rotating the wrong way when I
disconnected computer cable, rotated near correct azimuth and reconnected
cable. Program eventually concluded and went to sleep. I will
see if the quiding and dome corrects itself when it wakes up again.
**MKIV PROBLEM**: Fri Oct 30 20:51:47 GMT 1998
Barrel is oscillating around 278 degrees. Stopped Barrel CCW command.
Turned off spar power and found barrel at a limit. Rotated barrel
manually to a within-scan-limit location and turned spar power
back on.
**MKIV PROBLEM**: Fri Oct 30 20:57:52 GMT 1998
Still doing it--must've ran in the wrong direction. Trying again.
This time I will reset the KCC also (Power down/up).

MKIII COMMENT: Fri Oct 30 22:21:47 GMT 1998
Started to type Pau and the background white screen came on,
barfing out lines that the tape drive wasn't responding in
several different messages. Screen then went blank and unresponsive.
Moved to nene and rlogin'd to nahenahe to continue logs and
try to shut MKIV/MKIII down.
