Wed Dec 16 17:19:20 GMT 1998 CHIP Startup--Initializing new tape Wed Dec 16 17:25:16 GMT 1998 MKTTT Start Patrol Wed Dec 16 17:25:28 GMT 1998 CHIP CHIP Start Patrol Wed Dec 16 17:25:28 GMT 1998 CHIP CHIP Start Patrol **LOW-L PROBLEM**: Wed Dec 16 17:30:06 GMT 1998 L00563 was continuously being popped out and pulled back into drive #0. Data were going to L00564 in drive #1 and there was already 4 files on that tape according to the screen. That's strange also because it implies the tape started getting data yesterday afternoon. The amber light was blinking on the drive #0, I tried putting in the cleaning tape but it was treated the same way as L00563. I cycled the power to drive #0 and then the cleaning LEDs were blinking so I cleaned the drive and it seems normal now. Installed L00565 in drive #0. Twothings are interesting about that, it is strange to see two scans that are only one minute apart, how did that happen? The other things is that the 2004 and 2005 scans each looked like the two bad CW MKIV scans, like they were identical. The problems cleared without me reseting anything.
