MKIV COMMENT: Fri Apr 30 20:27:44 GMT 1999  
Stopping MKIV, in cirrus.  
WEATHER COMMENT: Fri Apr 30 20:27:59 GMT 1999  
In extensive cirrus, moderate thickness.  
Fri Apr 30 20:48:14 GMT 1999 MKIII Start Patrol  
MKIV COMMENT: Fri Apr 30 20:51:12 GMT 1999

Running Height mask test.

\*\*MKIII PROBLEM\*\*:  
Fri Apr 30 21:00:30 GMT 1999  
With all avenues of solutions not affecting the ring or electronic noise,  
Kim finally authorized taking the bottle of gin out of the locker and  
we chanted a prayer to Pele and poured it on the lava. Noise went away!

Seriously, we're at a loss as to how Kim's find fixed things, but he found  
a shield on the load side of the +/-22V Corcom filter barely touching the  
+ (red) wire post. Noise went away when he lifted it away. This was the  
shield on the cable that I found the broken wire on DOY 99116 and resoldered.

WEATHER COMMENT: Fri Apr 30 22:26:50 GMT 1999  
In orographic clouds  
PICS COMMENT: Fri Apr 30 22:29:41 GMT 1999  
We adjusted the rotation of the rectangular mask and stem 1/2-degree  
to square it up on the camera and display screen. We moved the camera  
laterally to center the image on the camera screen. We moved the scale  
on the occulting wheel housing to zero the new P-angle setting.  
Previous to this, we rotated the polarizing beam splitter to fine tune  
its orientation so that the two solar images were directly above  
each other. Mask rotation was done to align the bottom edge of the  
mask with the bottom edge of the display frame.  
Fri Apr 30 22:48:28 GMT 1999 CHIP CHIP End Patrol  
Fri Apr 30 22:49:17 GMT 1999 CHIP ending tape
