PICS COMMENT: Fri Jul 2 17:19:13 GMT 1999
PICS camera returned from KODAK MASD yesterday afternoon. Removed from
box and tested with short cable on the workbench and shutter worked OK.

CHIP PROBLEM: Fri Jul 2 18:29:43 GMT 1999
Stopping to inspect CHIP filter for smudges.
Fri Jul 2 18:32:33 GMT 1999 CHIP CHIP End Patrol
COMMENT: Fri Jul 2 18:47:28 GMT 1999
jamming spar around while working upstairs.
CHIP PROBLEM: Fri Jul 2 19:06:32 GMT 1999
There is no smudging on the front surface of the CHIP filter but
I can see smudging on the edge of the back element. Attempting to
remove the smudge.
MKIV COMMENT: Fri Jul 2 19:08:09 GMT 1999
Stopping MKIV/III. Spar is way out of balance, I am leaning on things,
and spar is not pointing toward the sun for the most part.
CHIP PROBLEM: Fri Jul 2 19:55:49 GMT 1999
Moved filter as far forward as I could without jeopardizing the
connectors and running the dovetail off the rail. Cleaned off smudge
with foam-tipped swabs and minimal ethanol using an inspection mirror
to view surface. Dusted it off with the compressor. Remounted filter
against the camera shield.

CHIP PROBLEM Fri Jul 2 20:22:27 GMT 1999

graininess around darker features in south look similar to features in the north when viewed on the focus window. Contrast improves using table 3 colorizing. Will wait for Boulder scrutiny to see if there was significant improvement due to the filter window cleaning.

PICS COMMENT: Fri Jul 2 20:25:15 GMT 1999

I may jostle the spar around again as I next work on re-installing the Kodak Megaplus 1.6i camera into the PICS and work on positioning the image.

PICS COMMENT: Fri Jul 2 22:01:26 GMT 1999

OK! Centered image as best I could and then did a rough focus to find a good range. Applied a Hartman mask to front of O1 and repeated focus iterations until I found, in my opinion, a good focus.

Buttoned up the PICS and started a series of data scans.
