

-----  
Mauna Loa Solar Observatory Observer's Log  
-----

Sun Sep 5 17:11:47 GMT 1999

Year: 99 Doy: 248

Observer: koon

WEATHER COMMENT: Sun Sep 5 17:11:49 GMT 1999

Cloudy and foggy and rainy, very foggy down below, little or no wind,  
temp=38 F.

COMMENT: Sun Sep 5 17:12:25 GMT 1999

Will wait for weather to clear before observing.

\*\*MLSO PROBLEM\*\* : Sun Sep 5 17:12:53 GMT 1999

Still have those time messages that I first reported yesterday morning,  
may not be a real problem but it is something different.

\*\*MLSO PROBLEM\*\* : Sun Sep 5 17:31:19 GMT 1999

Nahnahe is also displaying slightly different time messages now that I'm  
letting it just sit there without running the observing program, this is  
what they look like:

Sep 5 17:17:59 nahenahe inetd[20353]: ingreslock/tcp: bind: Address already in use

Sep 5 17:27:59 nahenahe inetd[20353]: ingreslock/tcp: bind: Address already in use

Kii shows the same messages I mentioned yesterday, but I didn't type Run  
in that cmdtool window yet. Nene doesn't show any of the messages, that  
is the same as yesterday.

\*\*MLSO PROBLEM\*\* : Sun Sep 5 17:34:32 GMT 1999

David suggested I check the computer clocks, they all match WWVH time as  
far as I can resolve.

COMMENT: Sun Sep 5 17:47:35 GMT 1999

Since it is unlikely that the weather will clear in the next few hours

I will make system backup tapes (ufsdump tapes) for Nahenahe and Kii and Nene.

COMMENT: Sun Sep 5 18:32:58 GMT 1999

Backup tapes are all finished, for Kii and Nene and Nahenahe.

WEATHER COMMENT: Sun Sep 5 18:33:28 GMT 1999

Still cloudy and rainy.

WEATHER COMMENT: Sun Sep 5 22:19:40 GMT 1999

Still cloudy and foggy, no observing today.

Sun Sep 5 22:21:37 GMT 1999
