Screen readout of Sky Trx is varying between 322 and 326, a lot more steady than what I saw on Thursday.

LOW-L PROBLEM : Sat Sep 11 23:16:46 GMT 1999

It looks like the data stopped going to L00625 sometime this morning and then was written to L00626 in drive #0 for a while (4 files) before the program crashed completely with graphic rectangles across the screen. Removed both tapes and installed L00627 in drive #0 and L00628 in drive #1, cycled power to PC.
