I started observing using yesterday's data tape, there was a mixup yesterday. So I removed P01693 and replaced it with a new tape P01694 and restarted obs.

COMMENT: Thu Mar 16 18:29:47 GMT 2000

Spar is having trouble tracking due to high wind.

MKIV PROBLEM: Thu Mar 16 19:09:45 GMT 2000

I don't see any structure in the scans, kind of like a Dark scan but I do see the signal coming through on the O-scope. This starts on the 1855 scan which is right after the calibration I think.

COMMENT: Thu Mar 16 19:22:49 GMT 2000

Extended the dome slot.

MKIV PROBLEM: Thu Mar 16 19:30:39 GMT 2000

I tried pausing and restarting the Patrol, still no scan signal seen.

Trying another calibration.

MKIV PROBLEM: Thu Mar 16 19:52:18 GMT 2000

The problem was the Opal being in the light path, very deceptive problem because the O-scope signal looks almost the same as normal in that condition. This means the cals are probably bad so I'll have to do another, hopefully this 3rd cal is good.
