Did a guider ephmcal earlier today.

WEATHER COMMENT: Thu Sep 7 19:36:02 GMT 2000

Thick, dark orographic clouds are starting to close in from all directions.

CHIP PROBLEM: Thu Sep 7 20:09:23 GMT 2000

Stalled at Program: Fixcenter, Optics: Busy. May have happened a while back when there was a couple of power glitches, I thought everything survived than but could have been wrong. Did a Kill/Run cycle to restart.

MLSO PROBLEM: Thu Sep 7 22:39:34 GMT 2000

I worked on the Dome shutter binding that Eric noticed and worked on a few days ago. I changed 2 bearing alignments and the drive gearbox mesh on the shutter rack. That eliminated the two major binding areas: near full open and near full closed. The battery for the lift didn't hold a recent charge due to low electrolyte, I filled it and charged it again, and cleaned it up.
