Cloudy and rainy, wind=10 mph from the SE, temp=42 F.

PSPT PROBLEM : Thu Oct 19 17:04:52 GMT 2000

There is the same Sendmail error message on the screen this morning as yesterday morning. Gtar of PSPT data went OK yesterday so this may be a minor problem. Once again here is the message:

Oct 18 23:51:26 pspt.mtn.hawaii.gov sendmail[25137[: XAA25134: SYSERR (pspt1):
Cannot exec /bin/mail: Permission denied

See yesterdays log for the same type of error message. Did someone change PSPT software lately? These messages imply someone may have changed a program to send email, or changed the Sendmail configuration file.

WEATHER COMMENT: Thu Oct 19 19:10:28 GMT 2000

Still very rainy, observing unlikely for today.
