
Mauna Loa Solar Observatory Observer's Log

Fri Dec 1 17:09:21 GMT 2000

Year: 00 Doy: 336

Observer: yasukawa

WEATHER COMMENT: Fri Dec 1 17:09:42 GMT 2000

Cool, clear, light southwest breeze.

PICS PROBLEM: Fri Dec 1 17:20:27 GMT 2000

PICS and CHIP temperatures are all low this morning. Starting up instruments anyway.

Fri Dec 1 17:22:43 GMT 2000 CHIP Start 7 Passband Patrol

Fri Dec 1 17:23:09 GMT 2000 MKIV Start Patrol

Fri Dec 1 17:23:19 GMT 2000 PICS Start Patrol

MKIV PROBLEM: Fri Dec 1 17:42:47 GMT 2000

looks like we are getting a little bit of spill off the occulter around the south. May need to adjust the guiders again.

CHIP PROBLEM: Fri Dec 1 17:45:13 GMT 2000

CHIP image is off temperature.

Fri Dec 1 18:02:27 GMT 2000 PICS Flat

MLSO PROBLEM: Fri Dec 1 18:04:29 GMT 2000

Attempting to align the spar guider to get rid of spill. Pushed on spar while attaching connectors to O1 guider mechanisms. Repointed spar.

MKIV PROBLEM: Fri Dec 1 18:14:49 GMT 2000

Adjusted O1 guiders to mid-range. Streaking around south is gone.

Fri Dec 1 18:17:51 GMT 2000 PICS End Patrol

Fri Dec 1 18:20:26 GMT 2000 PICS Start Patrol

**** EVENT COMMENT ****: Fri Dec 1 18:36:11 GMT 2000

CME at PA 290-310.

A NEW TAPE HAS BEEN PUT INTO KAIEE DLT DRIVE, Fri Dec 1 19:47:31 GMT 2000

Fri Dec 1 20:01:23 GMT 2000 CHIP LSD

Fri Dec 1 20:04:10 GMT 2000 CHIP End LSD

Fri Dec 1 20:05:30 GMT 2000 CHIP Bias7

Fri Dec 1 20:06:24 GMT 2000 CHIP End Bias7

MKIV PROBLEM: Fri Dec 1 21:03:37 GMT 2000

Looks like the tweek we did on the guider is now causing spill on the north, may be due to the size of the solar image this time of year.

The adjustment we did this morning was really small.

Fri Dec 1 21:25:00 GMT 2000 PICS End Patrol

MKIV PROBLEM: Fri Dec 1 21:25:16 GMT 2000

Adjusting spar guider. Images will be funny for a bit.

Fri Dec 1 21:34:16 GMT 2000 PICS Start Patrol

MKIV PROBLEM: Fri Dec 1 21:34:17 GMT 2000

Got rid of the spill in the north. We may need to look at the guiding again in the morning and if we see spill in the south again, it may be the time-of-year thing where the solar image is too large of the

occulter and we will encounter spill either in the morning or in the afternoon. In that case, we should adjust the guiser to avoid spill in the morning, during our best sky.

Fri Dec 1 22:12:32 GMT 2000 CHIP End Patrol

Fri Dec 1 22:12:46 GMT 2000 PICS End Patrol

MKIV PROBLEM Fri Dec 1 22:12:47 GMT 2000

Starting to get noise around the north again. Image still spilling around occulter, needed to have tweaked it a bit more. We'll leave it and see what it looks like in the morning.

Fri Dec 1 22:24:17 GMT 2000
