Observer: yasukawa

WEATHER COMMENT: Tue Feb 6 17:16:25 GMT 2001

Cold, clear, but bright sky at horizon, light southwest wind.

MKIV PROBLEM : Tue Feb 6 17:29:11 GMT 2001

Had to clean off what looked like a fingerprint smudge on the front surface of the O1 using a dry wipe and lots of air.

CHIP COMMENT: Tue Feb 6 19:04:20 GMT 2001

Stopping CHIP to swap sparc5 kii with the sparc20 kii replacement.

Tue Feb 6 19:05:18 GMT 2001 CHIP End Patrol

CHIP COMMENT: Tue Feb 6 19:48:19 GMT 2001

Sparc20 is installed, camera tested via 'dv' command and is working.

David checked out micrometer function and it does not respond.

There is only one serial connector on the back of the sparc, labeled A/B.

David is checking the files to determine if the wrong port is specified for the new setup. Old sparc was using serialB for the micrometer.

CHIP COMMENT: Tue Feb 6 20:20:22 GMT 2001

David changed the port and things did not work so he changed them back and then the micrometer responded--hmmm...

We did a reboot and the reboot failed, something about INIT: Cannot create /var/adm/utmpx.

We reloaded the shipped vsftab and mnttab and rebooted. kii came back up.

Trying 'Run -n'

Windows are popping up in 'random' places, we will need to set them in the usual locations or get used to the difference.

Display image is not as nice as the old images. Not sure what is causing this.

MLSO PROBLEM : Tue Feb 6 22:05:48 GMT 2001

When it rains, it pours....

Declination reset itself while I was trying to reset the printers.

Repointed and reset guider.

COMMENT: Tue Feb 6 22:22:21 GMT 2001

OK, printer is set up on kaiee. I also changed nahenahe, kii, and nene Print Managers to send print jobs to kaiee now. Tested by sending partial log to printer and it printed out OK.

CHIP PROBLEM: Tue Feb 6 22:25:14 GMT 2001

Program works with some different appearances in the gui that'll take a little getting used-to or eventual fixing. Patrol, though, is not sending images over to kaiee. David and Alice will work on this overnight and hopefully have it fixed by tomorrow morning.
