
Mauna Loa Solar Observatory Observer's Log

Thu Apr 12 17:02:04 GMT 2001

Year: 01 Doy: 102

Observer: yasukawa

WEATHER COMMENT: Thu Apr 12 17:02:59 GMT 2001

Cool, in extensive cirrus overcast, brisk southwest wind.

Will run all systems anyway to test full-blast data transfers and ho'ike operation.

COMMENT: Thu Apr 12 17:04:20 GMT 2001

Late start this morning. GSA Cherokee, on what is likely to be its last day in service, had a catastrophic starter failure--continued problem from Tuesday morning's failure. We are supposed to get a new Cherokee today. Will need to tow old vehicle to shop later this afternoon.

Spent another early morning in the dark and rain looking under the hood =(

MLSO PROBLEM Thu Apr 12 18:36:00 GMT 2001

Problem with the old inkjet printer turned out to be with the parallel interface and a broken transport (that was the clunking noise on Friday). Repair is costly compared to the cost of a new unit so it was replaced and the new printer installed and tested.

COMMENT: Thu Apr 12 18:58:24 GMT 2001

Bunny reports ftp transfers are running normally with the new router. Just started PSPT since the cirrus thinned a bit (guiding is real flaky in thick clouds). This should not add any additional traffic thru the router though.

MLSO PROBLEM: Thu Apr 12 20:50:32 GMT 2001
Was attempting alternate keyboard placements for hoike. Pressed power button
on keyboard which did some funnies to the processor and monitor.
Did a system save and restore.

MLSO PROBLEM: Thu Apr 12 21:41:50 GMT 2001
Alan at NOAA requested we eliminate the Halon 1211 fire extinguishers
at our site due to contamination of their data that they are picking up.
He said this type of extinguishers are no longer used or recharged
due to environmental hazards of the halon. For now we can use the old,
uninspected CO2 units until we get new appropriate type extinguishers.
NOAA will dispose of the halon extinguishers properly for us.
