Got delayed. Just reset kcc now.  
\*\*MKIV PROBLEM\*\*: Fri Sep 21 20:19:21 GMT 2001  
That did not work, powered down Kcc and then powered it back up.

\*\*MKIV PROBLEM\*\*: Fri Sep 21 21:29:27 GMT 2001  
Removed monitor and checked it out. Power is out, fuse is OK. Sent a trouble message to order a replacement and find out if the alakai monitor, which uses RGB connections can be swapped with the akamai (the dead one) monitor. akamai has both RGB and HD15 connections and uses the HD15. alakai only has RGB available. If the swap is possible we will have to swap the connection at the kcc and mcc chassis--I hope the cables are long enough.

\*\*MKIV PROBLEM\*\*: Fri Sep 21 21:43:57 GMT 2001  
David emailed some commands to type into akamai window to run the mk4 without the mouse. The commands are working.

Stopping KCC and MCC to try a cable swap. It appears from the monitor manual that I can use either the HD15 or the RGB connector system so I will attempt to move the kcc output temporarily to the mcc monitor. I will swap the cables at the kcc and mcc--hope they reach.

\*\*MKIV PROBLEM\*\*: Fri Sep 21 22:00:56 GMT 2001  
Swap worked. Alakai monitor above the nene monitor now displays akamai output. The old kcc mouse next to nahenahe's mouse still controls the cursor--this is a bit confusing having the mouse and monitor that far apart, but, I did not want to move that many cables.  
No mcc monitor for now.
