Wed Oct 24 18:01:37 GMT 2001 PICS Flat

PICS PROBLEM Wed Oct 24 17:51:58 GMT 2001

Moved Spar off sun while looking for cause of disk image vignetting. The Home switch LED for the PICS Objective wheel isn't on. I checked the wheel after removing the objective and the light isn't being vignetted at the objective wheel or the baffles I could see down the tube. We'll need to adjust the Home switch when we get the PICS monitor reconnected after we get the monitor adapter - which will probably arrive today or tomorrow.

Wed Oct 24 19:05:08 GMT 2001 CHIP End Bias

PICS PROBLEM Wed Oct 24 19:07:07 GMT 2001

It appears that the filter wheel is slipping and not really turning, so it is always at the 656 nm position as noticed by David. I can see the Drive and Request module LEDs going on and off at the right time but the position and Home LEDs for the Filter Wheel aren't changing. So there is most likely a slipping shaft going to the Filter Wheel, this has happened before. I'll add that to the list of PICs things to work on when the monitor is reconnected tomorrow.

PSPT COMMENT: Wed Oct 24 19:39:37 GMT 2001

Was observing, pausing now due to arrival of orographic clouds.

WEATHER COMMENT: Wed Oct 24 19:41:33 GMT 2001

Small scattered orographic clouds are arriving.
