Mauna Loa Solar Observatory Observer's Log

Tue Jan 29 18:09:46 GMT 2002 Year: 02 Doy: 029 Observer: yasukawa WEATHER COMMENT: Tue Jan 29 18:10:13 GMT 2002 Cool, in heavy overcast, heavy rain and strong south wind. old/new control room transition leaking in all the usual places, although not as much water on the floor as the last storm. I will spend the morning mopping up and placing buckets under the main drips. **GONG PROBLEM**: Tue Jan 29 18:12:14 GMT 2002 Stopped by GONG on the way up, put on foul weather gear, and stowed and bagged the turret. Also did the weekly preventive maintenance. COMMENT: Tue Jan 29 18:52:34 GMT 2002 Dome is OK, no leaks. Tue Jan 29 19:09:19 GMT 2002 MkIV
