\*\*PSPT PROBLEM\*\* : Tue Feb 19 17:57:29 GMT 2002

Daily obs started out with a centered image. At 1754 UT, I noticed that the image had drifted off to the top right corner of the window. Aborted

Daily obs, moved spar closer to axis, restarted Daily obs.

\*\*PSPT PROBLEM\*\* : Tue Feb 19 18:00:17 GMT 2002

At 1825, images looked like the mirror was oscillating. I aborted program.

Alice sent instructions to install a later version of pspt.exe

so I installed C:\PSPT\SAVE06FEB\pspt.exe into C:\PSPT and restarted

Pspt on the Sparc. Restarted Daily Obs.

\*\*MKIV PROBLEM\*\* : Tue Feb 19 18:49:02 GMT 2002

Rats! I must not have pressed GO with enough authority to start the thermo printer logging mode. Nothing was printed this morning. I started it in 30-minute mode anyway and will leave that data on the tape for tomorrow. I will turn it off overnight and leave the heating pad off tonight so that we can log a cold start tomorrow.

GONG COMMENT: Tue Feb 19 18:58:15 GMT 2002
