MKIV COMMENT: Thu Feb 21 17:58:01 GMT 2002

I turned on the printer, starting temp=3.8 C, this is a test of an unheated camera trough, the heating pad was left off for the past few days. Tonight I'll try leaving the camera on via the main switch below the transformation board and I'll put on the heating pad too. We're trying to get the measured temperature up to around 25 C, ideally.
