MLSO PROBLEM: Fri Mar 15 18:52:57 GMT 2002

There was a brief power outage to some of the systems a little while ago.

It looked like it occurred to only one phase of the system as only the

OCP area (KCC, monitors) went dark. The Sparcs came back

up OK, and KCC rebooted. PC, LOWL, PSPT remained on.

CHIP PROBLEM: Fri Mar 15 19:35:44 GMT 2002

I just noticed that CHIP had stalled in FixCenter after the 18:50 image.

It must have been affected by the outage. Killed processes and will

restart observations after reconfiguring dome shutter.

WEATHER COMMENT: Fri Mar 15 19:40:16 GMT 2002

Aborted plan to reconfigure dome at this time. Orographic clouds are

building up all around. I will reconfigure dome if the clouds do not

obscure the sun when the CHIP gets closer to getting shaded by

the dome shutter.

WEATHER COMMENT: Fri Mar 15 19:56:34 GMT 2002

In orographic clouds.

PSPT COMMENT: Fri Mar 15 19:56:48 GMT 2002
