PICS PROBLEM Sat Apr 13 18:46:05 GMT 2002

Was getting timeouts on the Objective wheel, the home switch was working but the positions weren't being detected. Check mechanism at front of telescope and it looked OK. Stopped Patrol and removed and replaced the Objective Wheel Status board in control room, this fixed the detection problem, it appears to have been a bad connection or some strange logic hangup, it works well now.
